The Company's main office is located at Presnenskaya naberezhnaya, 10, block B, Moscow, Russia.

Principal business activities

The principal business activities of the Group are the production and distribution of mineral fertilisers. The main products of the Group are nitrogen based, phosphate based and complex fertilisers. The major production facilities of the Group are located in the Moscow, Perm and Kirov regions of the Russian Federation.

2. BASIS OF PREPARATION

The condensed consolidated interim financial statements of the Group have been prepared in accordance with International Accounting Standard ("IAS") 34, *Interim Financial Reporting*, as issued by the International Accounting Standards Board, except for the accounting for the investment in Uralkali OJSC. The Group does not have any information related to the financial position of Uralkali OJSC as at 31 March 2014 and its financial results for the three months then ended. Thus, it is impracticable for the Group to account for this investment applying equity method in accordance with IAS 28. The Group has continued to account for this investment at the fair value of its share in the net assets of Uralkali OJSC at the date of acquisition.

These condensed consolidated interim financial statements are prepared based on the accounting policies applied in the annual consolidated financial statements of the Group for the year ended 31 December 2013, and should be read in conjunction with the consolidated financial statements and accompanying notes included in the Group's consolidated financial statements for the year ended 31 December 2013.

3. SEGMENT INFORMATION

For management purposes the Group is organised in two segments, Nitrogen Fertilisers and Phosphate Fertilisers. Operating results for these segments are reviewed by the Chief Executive Officer ("the chief operating decision maker") in order to assess performance and allocate resources.

- Nitrogen Fertilisers: The nitrogen fertilisers segment comprises subsidiaries engaged in the production of
 nitrogen based fertilisers, complex fertilisers, ammonia, inorganic acids and other chemical products. The major
 subsidiaries and branches allocated to the nitrogen fertilisers segment are KCCW, located in the Kirov region of
 the Russian Federation, Azot branch of UralChem OJSC ("Azot branch") and PMF, located in the Perm region of
 the Russian Federation; and
- Phosphate Fertilisers: The phosphate fertilisers segment comprises subsidiaries engaged in the production of phosphate based fertilisers, complex fertilisers and inorganic acids. The major subsidiary allocated to the phosphate fertilisers segment is VMF, located in the Moscow region of the Russian Federation.

The chief operating decision maker (CEO of the Group) does not regularly review the operating results of other operations, which include smaller subsidiaries which are engaged in a variety of businesses, such as electricity and heat energy generation, construction, repairs and maintenance and processing of waste water. Accordinally, these operations are not reported as separate operating segments.

The profitability of the two operating segments is primarily measured based on OIBDA (operating profit adjusted for depreciation and amortisation) and net profit for the period. Since OIBDA is not a standard IFRS measure,

SELECTIVE NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS FOR THE THREE MONTHS ENDED 31 MARCH 2014 (UNAUDITED)

the Group's definition of OIBDA may differ from that of other companies. Costs and assets of subsidiaries of the Group engaged in transportation, sales and marketing activities are allocated (pro rata volume of services rendered by these companies to the operating segments) to operating segments within management reports reviewed by the chief operating decision maker. Costs and assets of subsidiaries of the Group engaged in other operations are not allocated to operating segments within management reports reviewed by the chief operating decision maker. Other income and expenses of the Group not incorporated in calculation of the operating profit are also allocated to operating segments.

Segment information provided to the chief operating decision maker for the reportable segments for the three months ended 31 March 2014 is as follows:

Litigation

The Group has a number of claims and litigations relating to sales and purchases. Management believes that none of these claims, individually or in aggregate, will have a material adverse impact on the Group.

Taxation contingencies in the Russian Federation

The Russian Federation currently has a number of laws related to various taxes imposed by both federal and regional governmental authorities, including VAT, corporate income tax, social taxes and other. Laws related to these taxes have not been in force for significant periods, in contrast to more developed market economies; therefore, the government's implementation of these regulations is often inconsistent or nonexistent. Accordingly, few precedents with regard to tax rulings have been established. Tax declarations, together with other legal compliance areas (for example, customs and currency control matters), are subject to review and investigation by a number of authorities, which are enabled by law to impose severe fines, penalties and interest charges. These facts create tax risks in Russia that are more significant than typically found in countries with more developed tax systems. Generally, tax declarations remain open and subject to inspection for a period of three years following the tax year.

While management believes that it has adequately provided for tax liabilities based on its interpretation of current and previous legislation, the risk remains that tax authorities in the Russian Federation could take different positions with regard to interpretive issues. This uncertainty may expose the Group to additional taxation, fines and penalties that could be significant.

Environmental matters

The Group is subject to extensive federal, state and local environmental controls and regulations in the regions of the Russian Federation in which it operates. The Group's operations involve the discharge of materials, contaminants and waste water into the environment that could potentially impact on flora and fauna, and give rise to other environmental concerns.

The Group's management believes that its production facilities are in compliance with all current existing environmental legislation in the regions in which it operates. However, environmental laws and regulations continue to evolve.

The Group is unable to predict the timing or extent to which those laws and regulations may change. Such change, if it occurs, may require that the Group modernise technology and upgrade production equipment to meet more stringent standards.

Management of the Group regularly reassesses environmental obligations related to its operations. Estimates are based on management's understanding of current legal requirements and the terms of licence agreements. Should the requirements of applicable environmental legislation change or be clarified and amended, the Group may incur additional environmental obligations.

Russian Federation risk

Emerging markets such as Russian Federation are subject to different risks than more developed markets, including economic, political and social, and legal and legislative risks. Laws and regulations affecting businesses in Russian Federation continue to change rapidly, tax and regulatory frameworks are subject to varying interpretations. The future economic direction of Russian Federation is heavily influenced by the fiscal and monetary policies adopted by the government, together with developments in the legal, regulatory, and political environment.

Russia produces and exports large volumes of oil and gas, its economy is particularly sensitive to the price of oil and gas on the world market.

In March 2014, sanctions have been imposed by the U.S. and E.U. on certain Russian officials, businessmen and companies. These official actions, particularly if further extended, may result in reduced access of the Russian businesses to international capital and export markets, capital flight, weakening of the Rouble and other negative economic consequences. The impact of these developments on future operations and financial position of the Company is at this stage difficult to determine.

13. EVENTS SUBSEQUENT TO THE REPORTING PERIOD

In April 2014 the Group reached an agreement with VTB Capital to extend commitment to provide the credit line that can be used to refinance loans received from Sberbank up to 23 July 2014.
